## SENSORS

## COMPONENTS

## SPECIFICATION

<b>Model</b>	iCLEBO OMEGA
<b>Dimension</b>	34,6(W) x 35,4(D) x 8,7(H)cm
<b>Power</b>	220 V
<b>Speed</b>	350 mm/s (Max)
<b>Filter</b>	HEFA filter
<b>Charging time</b>	180 min.
<b>Cleaning time</b>	80 min. (TURBO MODE:60 min.)
<b>Weight</b>	3,1 kg
<b>Battery</b>	Lithium Ion
<b>Noise level</b>	68,5 dB[A] (TURBO MODE:70 dB[A])
<b>Standby power</b>	Below 0,6 W
<b>Main Body Energy Consumption</b>	53 W
<b>Sensor</b>	Camera, PSD, Bumper, Dust detection, Floor carpet detection, IR

# “ 5-Step Cleaning System ”

## Camera Mapping

The wide-angle smart mapping system analyzes the space and thoroughly cleans with the least missing spots.

## Intelligent Turbo Mode

When cleaning the carpet and area with lots of dust, it automatically changes to Turbo Mode for stronger suction. Turning to Turbo Mode, it increases the suction power so it can intensively collect particles.

## Smart Sensing

OMEGA's smart Deep Corner Cleaning algorithm and 19 obstacle detect sensors increase the cleaning efficiency, especially more effective near walls, corners and furniture.

## No More Trouble with Pet Hair

Advanced V6 rubber blade prevents itself from hair tangles. It is especially useful for the house with pets, not only bringing ease of maintenance, but also improving product life.

## 110 Times Power UP

Improved BLDC motor lasts more than 10 years and its performance is 110 times more powerful than existing models.

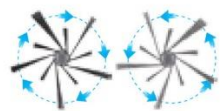

## Elaborate Side Brushes

The spinning 2 side brushes easily clean dusts around the furniture, alongside the wall and even in the corners.

1st

### Side brush

Side brushes gather surrounding dirt.

2nd

### V6 blade

Powerful V6 blade picks up the particles.

3rd

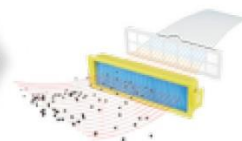

### Vacuum suction

Enhanced vacuum suction collects particles into the dust bin.

4th

### HEPA filter

HEPA filter blocks fine dust emission.

5th

### Wet mopping

The cleaning finishes with wet mopping.
